

Strategic Income Program

PROGRAM DESCRIPTION

The Sierra Strategic Income Program seeks to achieve satisfactory Total Return – income and capital appreciation – over each market cycle, while limiting drawdowns, an approach that has in recent years been called absolute return. It is a globally diversified strategy, with asset allocation tactically adjusted to reflect changes in the economic and market cycles. The Program invests in a diverse selection of mutual funds to access a wide range of income-oriented asset classes. A stop is placed under each holding that rises as its price rises, and the holding is sold when price declines below the stop to limit drawdowns even during periods of severe market declines. There are no set proportions or limits for the Program’s allocations.

‡The performance shown reflects a maximum annual fee rate of 1.80% through 12/31/2016, then 1.30% thereafter. The fee reduction represents a fee offset credit which equals the management fees paid to an affiliate of Sierra for that fraction of the Sierra account invested in the Sierra Mutual Funds. The performance shown applies to household relationships below \$500,000; fees are discounted for household relationships larger than \$500,000, so for such accounts, the net returns would be slightly higher.

The inception date of the Sierra Strategic Income Program is 12/31/2011. From 1/1/2012, the source of the performance data shown was from a composite of SMA accounts invested in the Strategic Income Program managed by Sierra.

The Sierra Strategic Income Program may be allocated up to 50% to a mutual fund managed by an affiliate of Sierra Investment Management, Inc. Allocations to this mutual fund began on 1/1/2017.

The performance quoted herein represents past performance. Past performance does not guarantee future results.
