

# Municipal Bond Program

## PROGRAM DESCRIPTION

The Sierra Municipal Bond Program seeks to produce satisfying long-term returns while limiting downside risk. The interest income from municipal bonds is tax-free at the federal level, providing a valuable benefit for clients in relatively high income tax brackets. Returns are created from interest income as well as increases in bond prices. The Program diversifies a client's account among at least four (often up to ten) municipal bond mutual funds. Each holding is monitored daily and during declines, a proprietary stop-loss discipline is implemented with the goal of limiting drawdowns. The Program will be fully invested when there are many Buy signals and will, at times, be fully in cash when the universe of municipal bond mutual funds are showing Sell signals.

The "Growth of \$1,000,000 – After Fees" graph and the "Quarterly Performance – After Fees" chart show the performance which was achieved in the Sierra Municipal Bond Program since the inception date of 7/1/2014. The performance presented is net of the annual fee rate of 1.800% through 12/31/2018 and 1.457% from 1/1/2019 to 1/1/2021, and 1.800% thereafter, which is calculated and deducted during the first month of each quarter. The fee reduction represents the Sierra mutual funds' fee offset credit for that fraction of the account invested in one or more of the Sierra mutual funds managed by an affiliate of Sierra Investment Management. Fees are less for households with more than \$500,000 under management. U.S. Dollars are the currency used to express performance results.

Since 1/1/2019, the Sierra Municipal Bond Program has been allocated to a mutual fund managed by an affiliate of Sierra. The fee reduction represents the Sierra mutual funds fee offset credit for that fraction of the account invested in one or more of the Sierra mutual funds.

<sup>1</sup>For purposes of illustration, the National Taxable Equivalent Returns table assumes the highest federal income tax rate of 43.40% was in effect through 12/31/2017. Beginning 1/1/2018, the table assumes the highest federal tax rate of 40.80%. On that basis, the table shows the taxable return that an investor in the highest federal tax bracket would have needed in order to net the same return after federal tax.
